EDGERS

LOG-MASTER
Portable Bandsaw Sawmill Mfg., Inc.

Log-Master builds the heaviest edger on the market today. They are over 20' long and weigh approximately 3,500 lbs. Our edger features carbide tipped split blades so you don't have to disassemble the edger to change the blades. NO re-alignment needed. We offer you two different power choices. This power and performance is at a level that has never been offered to consumers in the edger market before.

STANDARD FEATURES ON BOTH EDGERS:

- Hydraulic feed of the board through the carbide tipped split blades
- Four industrial in-feed and four out feed rollers
- 7' in-feed and 7' out-feed roller bed made out of massive structural frame made of 3" x 6" x 1/4" steel
- Massive 2" blade mandrall
- Highway approved trailer with 15" tires and 3,500 lbs. axle
- Easy to read scale at the front of the edger for the hydraulicly adjustable blade
- 6 quick level jacks that have 5,000 lbs capacity per jack

TWO MODELS TO CHOOSE FROM:

Model LM E25G
- 25 HP Kolher® engine
- 13" carbide tipped spilt blades

Model LM E26D
- 26 HP CAT® diesel engine
- 15" carbide tipped blades

KOHLER engines

CAT®

CAT® is a registered trademark of Caterpillar Inc.
KOHLER® is a registered trademark of Kohler Power Systems, Inc.
